

Sperry Marine

Hydraulic Steering Gear

**Proven design for maximum
performance and reliability**

Hydraulic Steering Gear

A dependable and versatile range of hydraulic steering systems. Providing hydraulic steering gear for many different requirements.

With a long history of expertise in navigational systems, Sperry Marine has an unrivalled reputation for providing equipment and systems to suit the specific needs of mariners.

We provide a wide range of steering gears to suit many different requirements, from working tugs to super-yachts with multiple rudders.

Our steering systems offer many benefits, including:

- Cost-effectiveness and convenience
- Wide range of products
- Tailored to your needs
- Fully type-approved
- Total support

Cost-effective and Convenient

It couldn't be easier to acquire your new Sperry Marine steering system. We provide a single point of contact to ensure delivery, installation and commissioning of your complete package, according to your specification.

Our innovative use of standard components enables us to achieve low cost configurations.

Wide Range of Products

We can provide steering systems for all types of vessels and yachts, from 15 meters up to 100 meters, 5000 GT, and

for all hydraulic steering configurations – single rudder, multiple independent synchronised rudders or mechanical linked rudders.

The range includes simple hand hydraulic steering systems as well as complex electric-hydraulic power steering systems, and includes motor starter systems, alarm systems, steering control systems, autopilot interfacing and rudder indicators.

System features include:

- cylinders with spherical bearings
- split or non-split helms
- rudder angles to 60 degrees
- low-noise vane pumps

A variety of optional features include:

- proportional valves
- dual- or multi-flow fast steering response
- adjustable pumps
- servo hand pumps
- all control systems
- control panels

Tailored to Your Needs

Sperry Marine steering gears use standard sets of cylinders that can be employed in most applications. This modular design allows us to easily design and configure systems to meet

specific requirements and regulations, while obtaining the best cost-performance ratio, with the minimum maintenance. We can provide almost any required configuration:

- Mechanical rudder interface
- Manual hydraulic steering
- Single electric-hydraulic steering system
- Dual electric-hydraulic steering system.

Modes of operation include full follow-up and non follow-up, in either single or dual configurations.

Besides being cost-effective, this modular approach also means that we can install your steering system quickly and efficiently.

If your requirements cannot be met through our modular process, we can always design solutions to meet your specific requirements.

Fully type-approved

All Sperry Marine steering system components are designed and manufactured to meet all major classification standards, including: LROS, ABS, BV, GL, USCG, DNV,RINA, SOLAS, IMO and SI.

We always ensure that our steering systems are installed by experienced engineers, who will undertake all commissioning and sea trials.

Steering Gear Calculation Sheet

General Information			
Customer		Type of vessel	
Shipyard		Hull No.	
Contact Person		Class Society	
Tel. No		Class Notation	
		Flag State	
Technical Information			
Ships power supply		Speed	
Frequency (Hz)		Max. angle	
No. of rudders		H.O.Time	
Connecting rod		Diesel Engine Type	
Rudder distance (mm)		PTO on Diesel	1.15
Tiller type		RPM Idle	
Stock diameter (mm)		RPM on PTO	
Lever direction		Remarks	
Key direction		Text Labels	ENG.

All sizes in mm

A = mm

B = mm

C = mm

E = mm

Nozzle

Maximum rudder torque at max angle		kNm
Maximum rudder torque with nozzle		kNm
Max required rudder torque		kNm
Steering gear type		
Steering gear size		
Cylinder size		
Cylinder travel volume		CC
Total pumps per rudder		
Minimum hydraulic flow required		Ltr / min.
Size of pump required		CC pump
Theoretical relief valve pressure		Bar
Theoretical working pressure		Bar
Hydraulic unit type		
Req. E-motor power at max. torque (S6)		kW
Req. E-motor power for cont. use (S1)		kW
Req. Diesel motor power		kW

Sperry Marine

Total Support: 24/7/365

As with all Sperry Marine systems and products, our steering systems are supported by one of the world's most extensive worldwide service networks, with help available around the clock, 24 hours a day, 365 days a year. Our global service network provides prompt shipboard maintenance and repair services in every major seaport in the world.

We also offer comprehensive maintenance contracts, as well as support for all products for at least ten years after any is discontinued, so providing continuing peace of mind to all our customers.
